Redundancies & Anomalies

- Student and course information is replicated. This can cause erroneous entries if new data is mistyped. In fact, erroneous entries already exist.
- Incomplete entries can be made. Student data and course data is missing for some entries. Some courses include section, some don't. The same course is represented differently (CSCE A360 / CSCE A360 201).
- Dates are formatted differently. Depending on how the data is stored and formatted, this could cause issues with sorting and filtering.
- Days/Time columns don't allow for easy sorting/filtering.
